What is In-Home Therapy Service?

- IHTS is a combination of therapy plus coordination of care.
- Therapy services happen in the home, school, or community.
- Coordination of care is when we talk with other providers & come up with better solutions to help families.
- IHTS is intended for families with complex clinical needs and complex coordination of care needs that traditional outpatient therapy cannot adequately address.
- Typical referrals sources include: Schools, DSS, Juvenile Justice and Outpatient Therapy Providers.

Where is IHTS on the Continuum of Service?
